Introduction

NAKANISHI INC. (hereinafter referred to "NSK") promotes environmental activities based on our management policy of reducing the environmental impact of all our business activities, including research and development, manufacturing, sales, and service of ultra-high speed rotary equipment and realizing a healthy and prosperous society in harmony with nature.

NSK has established the Environmental Policy, and we are uniting our efforts to give consideration to the environment through all our products and activities in all business processes.

Based on this concept, we have clarified medium- to long-term targets and managed specific activity items and target values.

Among them, there is a wide range of issues that we must address, and we need to comprehensively assess the environmental impact of our products throughout their entire life cycle, from the "manufacturing" stage to the "use" stage, and then to the "reuse" and "return" stages as resources after the products have fulfilled their roles.

NSK promotes green procurement as one of our efforts at the "manufacturing" stage.

Green procurement refers to the procurement of products, parts, and materials with less environmental impact from suppliers who actively promote environmental conservation. In order to promote business activities that reduce the environmental impact and risks of hazardous chemical substances, it is necessary to carry out activities throughout the entire supply chain, and the cooperation of our business partners is essential.

We would like to ask our suppliers to understand and cooperate in green procurement for the creation of a sustainable society.

NAKANISHI INC.

Environmental Management System section, General Administration Department

Purpose and Scope of Application

Purpose of Green Procurement

As various environmental issues such as global warming, resource depletion, and the destruction of ecosystems become more serious, demands and expectations for companies to reduce their environmental impact are increasing.

NSK contributes to the realization of a sustainable society by promoting manufacturing with the aim of reducing the environmental impact of our products throughout their life cycles through all business activities, including research and development, manufacturing, sales, and service.

As part of these activities, green procurement aims to procure products and services that have less environmental impact from suppliers who are actively engaged in environmental conservation activities, taking into account the proper use of chemical substances, conservation of ecosystems, energy conservation, resource conservation, and ease of recycling, decomposition, and disposal.

Scope of Green Procurement

This applies to the following delivered products.

- · Products (finished and semi-finished products)
- · Parts (electrical/electronic parts, mechanical parts, others)
- · Materials (metals, resins, others)
- · Subsidiary materials (adhesive, silicon, paint, ink, solder, others)
- · Packaging materials, printed materials (trays, bags, cushioning materials, tapes, printing ink, others)
- · Instruction manual (The instruction manual that is shipped with the product)

Requirements of Green Procurement

In order to promote green procurement, NSK asks all of our suppliers to understand green procurement and cooperate with the following two things.

- · To actively engage in environmental conservation activities
- · To deliver products and materials with reduced environmental impact to NSK

Specifically, please check the following "Requests to suppliers" and "Reduction of environmental impact and management of chemical substances in delivered products".

Reduction of environmental impact and management of chemical substances in delivered products

Reduction of environmental impact

Regarding products delivered to NSK, please follow the items below to improve environmental performance. We would also like to ask our suppliers for the same consideration when procuring raw materials and parts.

- · Reduction of CO2 emissions
- · Reduction of industrial waste generation
- · Proper use of chemical substances
- · Provision of environmental information on products and materials

Information management of chemical substances

With the support of our suppliers, NSK delivers environmentally friendly products to society. We would like to ask our suppliers in the upper stream of the supply chain to cooperate in the survey. In consideration of customer requirements and laws and regulations related to medical devices, we divide the chemical substances to be controlled into two categories: "Prohibited Substances" and "Controlled Substances" to compile information on chemical substances contained in delivered products.

- · Prohibited Substances: See Table 1,2,3,4
- · Controlled Substances: See Table 5

In addition, we may ask our suppliers to understand and cooperate with the survey chemical substances used in the manufacturing, storage, and transportation phases until delivery, even if they are not finally contained in the delivered products.

Survey on chemical substance contained in products

NSK asks our suppliers for environmental considerations. Regarding chemical substances contained in products, we requires our supplier to guarantee the non-inclusion of chemical substances.

If non-inclusion of chemical substances in products is indicated as a condition of purchase specifications, we request our supplier to submit the "non-use warranty" in Table 6 and chemSHERPA (AI) sheet.

"Non-inclusion" refers to the case where it has been clarified by reasonable procedures that the chemical substance is not contained or is below a predetermined threshold value in the homogeneous material, regardless of "intentional addition" or "unintentional contamination of impurities".

a) Materials and data to be submitted

With regard to the formats for managing chemical substances contained in products, NSK is working to respond flexibly to the formats widely adopted by industry, with the first priority on the usability of our suppliers.

At present, we use the following formats as the basis for input.

<Survey format>

chemSHERPA (AI) sheet, non-use warranty

* chemSHERPA: This is the format for transferring information on chemical substances contained in products provided by JAMP.

chemSHERPA (AI) is a survey format that deals with chemical substances contained in articles.

* Information such as SDS (Safety Data Sheet) and parts mass may be requested as necessary.

b) Non-use warranty

For "Prohibited Substances" in Table 1, please submit "Non-use Warranty" in Table 6 (distributed at the time of request for investigation).

In addition, please submit "Non-use Warranty" in Table 6, including information that can identify the product, such as the product name and product number, to be reported.

Guidelines for managing information on chemical substances contained in products

As the use of "Prohibited Substances" is basically banned by laws and regulations in Japan and abroad, it is necessary to guarantee "non-inclusion" from the viewpoint of legal compliance.

Regarding "Controlled Substances", it is necessary to appropriately manage the content information regardless of whether or not the chemical substances are contained in products.

In the event of a change in the chemical substance content information

In the event of any new inclusion in the delivered products or any change in the reported contents of the delivered products for any reason, please contact us immediately.

Revision of Green Procurement Guidelines

These Guidelines may be revised as follows. In that case, we will promptly notify our suppliers by e-mail or in writing.

- · Change in laws, regulations, or customer requirements
- · For parts that have been reported once, our Purchasing Department will inform our suppliers of the content of each change in the event of any change in the "Prohibited Substances" or "Controlled Substances" due to the revision of the law.

Based on the content, please use the specified form to answer the status of inclusion.

Table-1 Prohibited substances List

■ EU RoHS Directive

Rev.15 (1/2 page)

No	Chemical substances	Reference material	CAS No	Threshold level	Main relevant regulations
1	Cadmium and its compounds	(See Appendix 2-1) (See Appendix 3-1)	-	100ppm or less	RoHS directive (EU) REACH regulation Annex XV II(EU)
2	Lead and its compounds	(See Appendix 2-2) (See Appendix 3-2)	I	I1000nnm or less	RoHS directive (EU) REACH regulation Annex XV II(EU)
3	Mercury and its compounds	(See Appendix 2-3) (See Appendix 3-3)	I	1000ppm or less	RoHS directive (EU)
4	Hexavalent chromium compounds	(See Appendix 2-4) (See Appendix 3-4)	-	1000ppm or less	RoHS directive (EU) REACH regulation Annex XV II (EU)
5	Polybrominated biphenyls (PBBs)	(See Appendix 2-5) (See Appendix 3-5)	=	***	RoHS directive (EU) REACH regulation Annex XV II (EU) Persistent Organic Pollutants (POPs) Regulation (EC) No.2019/1021
6	Polybrominated diphenyl ethers (PBDEs)	(See Appendix 2-5) (See Appendix 3-5)	=	1000ppm or less	RoHS directive (EU) Toxic Substances Control Act (TSCA) *DecaBDE-decabromodiphenyl ether (DBDE) only
7	Bis (2-ethylhexyl) phthalate (DEHP)	(See Appendix 2-6) (See Appendix 3-6)	117-81-7	1000ppm or less	RoHS directive (EU) (Except for non-electrical and electronic equipment)
8	Butyl benzyl phthalate (BBP)	(See Appendix 2-6) (See Appendix 3-6)	85-68-7	1000ppm or less	RoHS directive (EU) (Except for non-electrical and electronic equipment)
9	Dibutyl phthalate (DBP)	(See Appendix 2-6) (See Appendix 3-6)	84-74-2	1000ppm or less	RoHS directive (EU) (Except for non-electrical and electronic equipment)
10	Diisobutyl phthalate (DIBP)	(See Appendix 2-6) (See Appendix 3-6)	84-69-5	1000ppm or less	RoHS directive (EU) (Except for non-electrical and electronic equipment)

■RoHS exemption

The RoHS Directive stipulates "exempted uses" that permit the inclusion of prohibited substances for use that cannot be technically substituted.

 $\underline{\text{The revised RoHS Directive } (2011/65/\text{EU: RoHS2}) \text{ has two types of lists: AnnexIII and AnnexIV.}}$

Please check the latest lists and strictly observe that prohibited substances do not contain more than the allowable amount.

■ REACH regulation restriction

No	Chemical substances	Reference material	CAS No	Threshold level	Main relevant regulations
1 10	REACH規制 Annex XV II(EU) Target chemical substance	(See Appendix 4)	-	Do not use if the conditions of the restriction are not met	REACH規制 Annex XV II (EU)

■REACH regulation Annex XVII (EU)

From Article 67 of the REACH Regulation, substances contained in the preparations or articles of the substances whose restrictions are stipulated in Annex XVII cannot be manufactured, marketed or used unless the conditions of the restrictions are met.

■ Toxic Substances Control Act (TSCA) substances

No	Chemical substances	Reference material	CAS No	Threshold level	Main relevant regulations
11	Phenol, isopropylated phosphate (3:1)-(PIP)	(See Appendix 2-7) (See Appendix 3-7)	68937-41-7	Prohibition of use	Toxic Substances Control Act (TSCA)
12	DecaBDE – decabromodiphenyl ether (DBDE)	(See Appendix 2-5) (See Appendix 3-5)	1163-19-5	Prohibition of use	Toxic Substances Control Act (TSCA) RoHS directive (EU) Japan Chemical Examination Law/Type 1 specified chemical substances
13	Hexachlorobutadiene (HCBD)	(See Appendix 2-8) (See Appendix 3-8)	87-68-3	Prohibition of use	Toxic Substances Control Act (TSCA) Japan Chemical Examination Law/Type 1 specified chemical substances
14	Pentachlorothiophenol (PCTP)	(See Appendix 2-9) (See Appendix 3-9)	133-49-3	10000ppm or less	Toxic Substances Control Act (TSCA)
15	2,4,6-TTBP – 2,4,6-tris (tert- butyl) phenol (TTBP)	(See Appendix 2-10) (See Appendix 3-10)	732-26-3	3000ppm or less	Toxic Substances Control Act (TSCA) Japan Chemical Examination Law/Type 1 specified chemical substances

■ U. S. TSCA exclusions and exemptions

U.S. Toxic Substances Control Act (TSCA) defines "Exclusions" that allow the activities of manufacture, import, export, process and commertially distribute products/molded products containing such PBT chemicals under certain

	Rev.15 (2/2 page)						
No	Chemical substances	Chemical substances	CAS No	Threshold level	Main relevant regulations

34	Formaldehyde	(See Appendix 2-29) (See Appendix 3-28)	50-00-0	75ppm of textile	Toxic Substances Control Act (TSCA) BGB 1990/194: Formaldehyde Restriction § 2, 12/2/1990		
35	Perfluorocarboxylic acids containing 9 to 14 carbon atoms in the chain (C9-C14 PFCAs),their salts and C9-C14 PFCA-related substances	(See Appendix 2-31) (See Appendix 3-29)	-	Intentional prohibition and 0.025 ppm or less as PFCA and its salt Total concentration of PFCA-related substances 0.26ppm or less	REACH regulation Annex XV II(EU)		
36	Perfluorohexane-1-sulponic acid and its salts (PFHxS)	-	-	Details will be set depending on the regulation to be promulgated hereafter.	Persistent Organic Pollutants(POPs) review committee(POPRC) recommended to eliminate PFHxS in the meeting held in Oct.,2019.		

Table-2 Prohibited substances / substances List

■ EU RoHS Directive

<u>Table 2- 1</u> Rev.15 (1/5 page)

Substance/Substance Group Name: Cadmium and its compounds

Regulated items

All applications except those in the exemptions shown below. (See Table 2-26 for packaging material)

[Applications and use examples]

Stabilizer/pigment/dye/paint/ink used for plastics (including rubber, film), phosphor, alloy, packsging materials, etc

Exemption - Uses in batteries as materials for batteries *1*2 (under the EU Battery Directive)

- *1: Batteries:primary batteries, accumulators (secondary batteries), and battery packs.
- *2: Check the individual law or regulation, and take actions if necessary.

Table 2-2

Substance/Substance Group Name: Lead and its compounds

Regulated items*1

All applications excepy those in the exemptions shown below. (See Table 2-26 for packaging material)

[Applications and use examples]

Paint, pigment, dye, inc, stabilizer in plastic (including rubber) material

Solder coating on snd packaging material of component external slsctrode, lead terminal, etc

Exemption - Uses in batteries *2*3 (under the EU Battery Directive)

- *1: For products destined for in North America subject to the California Proposition 65 Settlement Agreement dated September 3,2002,if lead is intentionally added to the surface material covering the cord, or its lead content exceeds 300ppm (0.03%), a warning label is required.
- *2: Batteries: primary battery, accumulators (secondary batteries), and battery packs.
- *3: Check the individual law or regulation, and take actions if necessary.

<u>Table 2- 3</u>

Substance/Substance Group Name: Mercury and its compounds

Regulated items

All applications excepy those in the exemptions shown below. (See Table 2-26 for packaging material)

[Applications and use examples]

Pigment, dye, paint, ink, indicator such as hour meter, relay, switch,

sensor where mercury is used for electrical contact, harmonizer in plastics, packaging material, etc.

Exemption - Uses in batteries *1*2 excluding mercury batteries (under the EU Battery Directive)

- *1: Batteries: primary battery, accumulators (secondary batteries), and battery packs.
- *2: Check the individual law or regulation, and take actions if necessary.

Table 2- 4

Substance/Substance Group Name: Hexavalent chromium compounds

Regulated items

- (1) Leather products snd leather components that have contact with the skin.
- (2) Other than the above: All applications except those in the exemptions shown below. (See Table 2-26 for packaging material)

[Applications and use examples]

Rust-proof treatment, plastics, paint, pigment, ink, packaging materials, leather (e.g. exterior parts of products,

leather parts of carryung cases)etc.

Exemption - Uses in batteries *1*2 (under the EU Battery Directive)

- *1: Batteries: primary battery, accumulators (secondary batteries), and battery packs.
- *2: Check the individual law or regulation, and take actions if necessary.

Table 2- 5 Rev.15 (2/5 page)

Substance/Substance Group Name: Specified Brominated Flame-retardant (PBB,PBDE)

(All PBBs and PBDEs including Deca BDE (deca-bromo-diphenyl-ether))

Regulated items

All applications

Products, components, and devices covered under the EU RoHS Directive, must not contain the above substances sxceeding 1000ppm in total. As for PBDE, articles (e.g. materials for batteries*1*2, packaging materials, toys, and nursery items.) must not contain PBDE exceeding 500ppm in total.

- *1: Batteries: primary battery, accumulators (secondary batteries), and battery packs.
- *2: For batteries, refer to individual law snd regulation, snd take actions if necessary.

<u>Table 2- 6</u>

Substance/Substance Group Name: Four phthalates

Bis (2-ethylhexyl) phthalate (DEHP*1), Butyl benzyl phthalate (BBP), Dibutyl phthalate (DBP), Diisobutyl phthalate (DIBP)

Regulated items

Products, components, and devices covered under the EU RoHS Directives must not include 1,000ppm or more per one phthalate.

Products covered under the EU REACH Annex XVII Restriction on phthalates (e.g. Materials for batteries* ², Packaging materials* ³, and Toys & childcare articles) must not include the phthalates 1,000ppm or more in total of the four phthalates.

[Applications and use examples]

Plasticizer for rubber, elastomer, and resin (particularly polyvinyl chloride)

Additive for paint, ink, and adhesives

- *1: DEHP is often called as DOP, particularly by material manufacturers; therefore, particular attention must be paid to the indication of 'DOP'.
- *2: Batteries: primary battery, accumulators (secondary batteries), and battery packs.
- *3: Note that the four phthalates in the packaging materials sre restricted in total concentration under EU REACH.

■ Toxic Substances Control Act (TSCA) substances

Table 2- 7

Substance/Substance Group Name: Phenol, isopropylated phosphate (PIP/PIP(3:1))

Regulated items

Regulation of Specified Chemical Substances and Mixtures Based on Article 6 of the Hazardous Substances Control Law-All uses other than those shown in § 751.407

[Applications and use examples]

Among other uses, present as flame retardant and/or plasticizing agent in polyvinylchloride (PVC) plastics, polyurethanes,

BPA epoxies, and some lubricants.

Table 2-8

Substance/Substance Group Name: Hexachlorobutadiene (HCBD)

Regulated items

All applications

[Applications and use examples]

Not likely to be present. HCBD is usually an intermediate chemical found in the production of other substances, but might remain as a residue.

Table 2-9

Substance/Substance Group Name: Pentachlorothiophenol (PCTP)

Regulated items

All applications

[Applications and use examples]

Among other uses, PCTP might be present in butadiene or isoprene rubbers.

<u>Table 2- 10</u>

Substance/Substance Group Name: 2,4,6-TTBP – 2,4,6-tris (tert- butyl) phenol (TTBP)

Regulated items

All applications

[Applications and use examples]

Present in some types of oils that might be used to lubricate components.

■ Prohibited substances

<u>Table 2- 11</u> Rev.15 (3/5 page)

Substance/Substance Group Name: Asbestos

Regulated items

All applications

[Applications and use examples]

Gasket (sealing material), insulator, filler, adrasive, pigment, paint, talc, thermal insulator.

Table 2- 12

Substance/Substance Group Name: Tributyl Tin (TBT) and Triphenyl Tin (TPT)

Regulated items

All applications

[Applications and use examples]

paint, pigment, preservative, stabilizers.

<u>Table 2- 13</u>

Substance/Substance Group Name: Dibutyltin (DBT) compounds

Regulated items

All applications

[Applications and use examples]

Preservative, antifungal, agent, paint, pigment, antifouling agent, foaming agent, solvent cleaner.

Table 2- 14

Substance/Substance Group Name: Dioctyltin (DOT) compounds

Regulated items

The following applications:

Textile articles intended to come into contact with the sikn.

<u>Table 2- 15</u>

Substance/Substance Group Name: Bis(tributyltin)oxide (TBTO))

Regulated items

 $\hbox{All applications}$

[Applications and use examples]

Preservative, antifungal agent, paint, pigment, antifouling agent, Foaming agent, solvent cleaner.

<u>Table 2- 16</u>

Substance/Substance Group Name: Polychlorinated Biphenyls (PCBs)

Regulated items

All applications

[Applications and use examples]

Insulation oil, lubricant oil, electric insulator, solvent, electrolyte, plasticizer, fire-retardant, flame retardant, coating agent for elestric wires and cables, dielectric sealant.

<u>Table 2- 17</u>

Substance/Substance Group Name: Polychlorinated terphenyls(PCTs)

Regulated items

All applications

[Applications and use examples]

Insulation oil, lubricant oil, electric insulator, solvent, electrolyte, plasticizer, fire-retardant, flame retardant, coating agent for elestric wires and cables, dielectric sealant.

<u>Table 2- 18</u> Rev.15 (4/5 page)

Substance/Substance Group Name: Polychlorinated naphthalenes (more than 2 chlorine atoms)

Regulated items

All applications

[Applications and use examples]

Lubricant, paint, stabilizer (electric property, flame-proof property, water-proof property)

insulator, flame retardant.

<u>Table 2- 19</u>

Substance/Substance Group Name: Alkanes, C10-13, chloro

Regulated items

All applications

[Applications and use examples]

Plasticizer for polyvinyl chloride (PVC), flame retardant.

Table 2- 20

Substance/Substance Group Name: Azocolourants and azodyes which form certain aromatic amines

Regulated items

The following applications:

- Textiles and leather products that may have direct contact with human skin snd/or oral cavities for anextended period of time.

Table 2- 21

Substance/Substance Group Name: Ozone Depleting Substances

Regulated items

All applications

Table 2- 22

Substance/Substance Group Name: Perfluorooctane sulfonate (PFOS)

Regulated items

All applications

<u>Table 2- 23</u>

Substance/Substance Group Name: Perfluorooctanoic acid and its compounds

Regulated items

All applications other then those shown in the Exemptions below

[Applications and use examples]

Fluororesin/Fluor rubber, Fluororesin coating, and antireflection agent in semiconductor exposure process.

Tab**l**e 2- 24

Substance/Substance Group Name: Fluorinated greenhouse gases (PFC, SF6, HFC)

Regulated items

Each product is restricted by PFC, SF6, HFC global warming potential (GWP) per use.

[Applications and use examples]

Extruded polystyrene form, Rigid polystyrene form, Polystyrene high pressure form spray, and pressure form sprey,

and Polystyrene low pressure form spray which were manufactured using PFC, SF6, HFC.

Table 2- 25

Substance/Substance Group Name: Hexachlorobenzene (HCB)

Regulated items

All applications

[Applications and use examples]

Polyvinyl chloride plasticizer.

<u>Table 2- 26</u> Rev.15 (5/5 page)

Substance/Substance Group Name: Redioactive substances

Regulated items

All applications

Table 2- 27

Substance/Substance Group Name: Specified benzotriazole

Regulated items

All applications

<u>Table 2- 28</u>

Substance/Substance Group Name: Dimethyl fumarate (DMF)

Regulated items

All applications

[Applications and use examples]

Moisture-proof agent, mold-proof agent.

<u>Table 2- 29</u>

Substance/Substance Group Name: Formaldehyde

Regulated items

Wood product and parts using materials such as particle boards and MDF (medium density fiberboard).

For formaldehydverordnung content in fiber, products sold in Europe subject to the Austria regulates
 (Austria - BGB I 1990/194:Formaldehydverordnung, regulated amount = 75ppm) must comply with this regulation.

<u>Table 2- 30</u>

Substance/Substance Group Name: Quadruple metal (Cadmium and lead and mercury and Hexavalent chromium)

Regulated items

All uses in packaging other than listed in the exempted items

[Applications and use examples]

Pigment, dye, paint, ink, packing material, adhesive agent, staple, label.

Exemption Case that reuse of the substance in a closed loop such as palettes is clearly stated. *1

*1: When a packaging material with a total content of four heavy metals exceeding 100ppm is reused in a closed loop confirm and handle each case individually since notification obligation etc. may be posed by the US Specified States Toxics in Packaging Regulation.

Table 2- 31

Substance/Substance Group Name: Perfluorocarboxylic acids containing 9 to 14 carbon atoms in the chain (C9-C14 PFCAs), their salts and C9-C14 PFCA-related substances (PFCA)

Regulated items

All applications other than those shown in the Exemptions below.

[Applications and use examples]

Fluororesin/Fluor rubber, Fluororesin coating, and antireflection abent in semiconductor exposure process.

Table-3 Prohibited Substances / Substances CAS Number List

■ EU RoHS Directive Table 3-1 Rev.15 (1/7 page)

Table 5 I			NCV.13 (1/ 1 page)
Substance/	'Substance Group Name: Cadmium and its compounds

List of prohibited substances / chemical substances (List of substances subject to REACH regulation restriction)

restrictions are stipulated in Annex XVII cannot be manufactured, marketed or used unless the conditions of the restrictions are met.

Reference URL: https://echa.europa.eu/substances-restricted-under-reach

The following two items correspond to the restrictions of the REACH rule.

- ① When unacceptable risk is caused by manufacturing, launch or specific use
- ② When it is necessary to deal with these risks on the basis of the entire community
